24737	7590	01/30/2006	EXAMINER	
PHILIPS INTELLECTUAL PROPERTY & STANDARDS P.O. BOX 3001 BRIARCLIFF MANOR, NY 10510			AU, GARY	
			ART UNIT	PAPER NUMBER

2681

DATE MAILED: 01/30/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/963,631	Applicant(s) VAN BEEK, WILLEM JAN DOUWE	
	Examiner Gary Au	Art Unit 2681	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 November 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 11-18 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 11-18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Response to Arguments

1. Applicant's arguments with respect to claims 11-18 have been considered but are moot in view of the new ground(s) of rejection.

DETAILED ACTION

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 11 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent No. 6,574,796 Roeck et al. (Roeck as used in the previous rejection).

Considering claim 11, Roeck teaches a receiver (receiver chip, col. 8 lines 33-58) comprising: means for receiving signals in a frequency band (50 – 860 MHz, col. 1 lines 61-63 as this range also applies to applicant's invention), the frequency band having a plurality of substantially equally spaced and sized frequency channels (frequency channel is typically 6 MHz wide in the United States, col. 4 lines 22-32), each channel comprising a respective plurality of frequency regions, each respective plurality comprising a respective known frequency region in which data signals are most easily

Art Unit: 2681

detectable (col. 9 lines 60-64); and means for searching the band for at least one channel containing useful data, the searching means being adapted to perform operations (cable modem scans every 6th MHz beginning with 88 MHz, col. 4 lines 59-64), the operations comprising: starting the search with a predetermined frequency value, this predetermined frequency value being within the respective known frequency region of a given channel (88 MHz, col. 4 lines 59-64); and stepwise scanning segments of the frequency band from the predetermined frequency value in accordance with frequency steps, the frequency band from the predetermined frequency value in accordance with frequency steps (cable modem scans every 6th MHz beginning with 88 MHz, col. 4 lines 59-64), the frequency steps being substantially equal to the bandwidth of the frequency channels (the bandwidth of the frequency channel is 6 MHz and the frequency steps is also 6 MHz, col. 4 lines 25-27, 59-64), the segments being frequency sub-bands that are substantially narrower than a channel, so that each step takes the scanning to a particular segment of the frequency band that is contained within the respective known region of a successive channel (col. 4 lines 52-67).

Considering claim 12, Roeck teaches the predetermined frequency value is based on the last known good signal (col. 7 lines 42-62).

Considering claim 13, Roeck teaches the predetermined frequency value is preprogrammed (col. 4 lines 52-67).

Art Unit: 2681

Considering claim 14, Roeck teaches a CATV system (two way HFC cable system – figure 1, col. 4 lines 44-52) comprising a primary station (headend 102 – figure 1, col. 2 lines 44-52) and a secondary station (PC 122 and cable modem 120 – figure 1, col. 3 lines 2-5), which secondary station comprises a receiver (receiver chip, col. 8 lines 33-58) as recited in claim 11.

Considering claim 15, Roeck teaches a method comprising executing operations in at least one data processing device, the operation comprising: receiving signals in a frequency band (50 – 860 MHz, col. 1 lines 61-63 as this range also applies to applicant's invention), the frequency band having a plurality of substantially equally spaced and sized frequency channels (frequency channel is typically 6 MHz wide in the United States, col. 4 lines 22-32), each channel comprising a respective plurality of frequency regions, each respective plurality comprising a respective known frequency region in which data signals are most easily detectable (col. 9 lines 60-64); and searching the band for at least one channel containing useful data (cable modem scans every 6th MHz beginning with 88 MHz, col. 4 lines 59-64), the searching comprising: starting the search with a predetermined frequency value, this predetermined frequency value being within the respective known frequency region of a given channel (88 MHz, col. 4 lines 59-64); and stepwise scanning segments of the frequency band from the predetermined frequency value in accordance with frequency channels (cable modem scans every 6th MHz beginning with 88 MHz, col. 4 lines 59-64), the segments being frequency sub-bands that are substantially narrower than a channel, so that each step

Art Unit: 2681

takes the scanning to a particular segment of the frequency band that is contained within the respective known region of a successive channel (col. 4 lines 52-67).

Considering claim 16, Roeck teaches the predetermined frequency value is based on the last known good signal (col. 7 lines 42-62).

Considering claim 17, Roeck teaches the predetermined frequency value is preprogrammed (col. 4 lines 52-67).

Considering claim 18, Roeck teaches the data processing device comprises a television receiver (receiver chip, col. 8 lines 33-58) coupled to a CATV system (two way HFC cable system – figure 1, col. 4 lines 44-52).

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2681

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Au whose telephone number is (571) 272-2822.

The examiner can normally be reached on 8am-5pm Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Grant can be reached on (571) 272-7294. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
